U4 PRICING AND PACKAGING VISUAL

1. Current Pricing Diagnostic

You already sell on a monthly retainer. The problem is how low each retainer is priced.

~$850	~18	~$22k/mo
AVG RETAINER TODAY	ACTIVE CLIENTS	LEFT ON THE TABLE

- **CFO scope at bookkeeping prices:** your ~$850 retainer bundles books by the 5th, a 13-week cash forecast and a monthly inventory/ad-spend call. That is fractional-CFO work, priced against overseas bookkeepers.
- **"Flexible structure" means custom quotes.** Every client sits at a different price, so the low end of your $500 to $2,000 range sets your average.
- **Hourly cleanup caps you.** Before: a 6-month backlog billed by the hour. After: a fixed-fee Catch-Up Sprint ($2,500 to $6,000) that ends in a retainer.
- **Biggest lever:** reprice the existing book. 18 clients × ($2,100 target average minus $850) ≈ $22,500/mo with zero new leads.

2. Package Architecture

You need $35k/mo at a 20-client cap, so your average retainer must be $1,750 or more. Plan for $2,100 to keep a buffer.

	FRACTIONAL CFO	BOOKS + FORECAST RECOMMENDED	BOOKS
Price	$3,500/mo	$2,500/mo	$1,800/mo
Best for	$5M to $10M, raising debt	$1M to $5M, Q4 inventory bets	Need clean books only
Books closed by the 5th (SLA)	✓	✓	✓
13-week forecast + SKU margin report	Weekly update	Monthly	×
Inventory & ad spend decision call	2× monthly	Monthly	×
Q4 Inventory Cash Plan + Lender-Ready Pack	✓	✓	×
Founder Slack line	Same day	1 business day	×
Lender/investor meetings with you	✓	×	×

- **Anchor:** show Fractional CFO first on the pricing page (live by June 30, 2026). Compare it to a $15k/mo full-time CFO, or $30k lost on one 30% MCA on a $100k Q4 deposit.
- **Decoy:** Books is 72% of the core price with roughly a third of the value, so the forecast plus decision call makes $2,500 the obvious pick.
- **Entry path:** 13-Week Cash Snapshot at $950 (credited to the Sprint), then the Catch-Up Sprint, then a retainer. No hourly work, no custom quotes.

3. Payment Terms & Negotiation Rules

- **Retainers:** billed in advance on the 1st by auto-pay (ACH via Stripe or QuickBooks Payments). Your 3-month minimum covers the first close, the first forecast and one decision call.
- **Catch-Up Sprint:** 50% non-refundable at signing, 50% when the caught-up books are delivered. The Snapshot is paid in full upfront.
- **Late payment:** work pauses after 10 days. Put a 1.5%/month late fee in the contract, capped at your state's legal maximum (state usury and late-fee rules apply). Unpaid months void the "closed by the 5th" SLA.
- **Existing clients:** send notice by July 1, 2026 for a September 1, 2026 effective date.

DISCOUNT REQUESTS

- *"Can you do it for less?"* "The price stays, but I'll run the Duplicate Payment & Leak Audit in month one. Last time it found $42k."
- *"Our budget is only $1,200."* "Then start with Books at $1,800 and move up once the forecast pays for itself before Q4."
- *"An overseas bookkeeper quoted $500."* "They'll categorize transactions. I'll tell you whether you can afford your August supplier deposit."

Raise new-client prices by $300 when 17 of 20 slots are filled. Raise existing clients 5% every January 1.

4. Revenue Math & Price Validation

SCENARIO	AVG DEAL	CLIENTS	REVENUE	FEASIBLE?
Current pricing	$850	41	$35,000	No: 2× your 20-client cap
Moderate (all on Books)	$1,800	20	$36,000	Tight: zero spare slots
Ideal mix: 12 Books, 4 Core, 2 CFO	$2,144	18	$38,600	Yes: 2 slots free

- **Gap is price.** Volume stays flat. Six low-fit clients leave, and you replace them at one new ideal client every 6 to 8 weeks through partners.
- **Signal check:** about 90% capacity ✓, offer scope beyond bookkeeping ✓, average at the bottom of your own range ✓. Three signals means you are undercharging.

> Key takeaway: repricing your current 18 clients gets you to about $38k/mo before your partner channel adds a single lead.
